- Consigned by Jones Show Cattle.
- Jones Show Cattle is proud to offer this stylish HAA Wisdom 505S daughter as the 2012 National Junior Show Donation Lot! Her dam, OHL Go Go Girl 383N, the Reserve Champion MaineTainer at the 2003 American Royal has done an outstanding job here at the Jones operation. Style, balance and eye appeal best describes this genetic gem. Along with her beautiful profile she presents a total genetic package, take notice of the spread in birth to yearling epd along with a 22.1 milk epd.
- We at Jones Show Cattle believe strongly in the AJMAA organization, see you in Lima, OH.

INSURANCE: 30 days coverage provided on JSC GO GO 320Y by American Live Stock Inc. Geneva, Illinois Jame Secondino Krieger 812-208-0956 and Stuart Wilson 217-454-9355

Thank you American Live Stock Inc.

The Board of the American Junior Maine-Anjou Association and the entire junior membership would like to take this opportunity to thank **Jones Show Cattle** for this generous donation. The money raised will go toward the 2012 National Junior Show, to be held June 17 to June 22 at the Allen County Fairgrounds in Lima, OH. Progressive breeders such as this elite program allows our Junior Association to offer young people of this breed opportunities to gain knowledge and experience that will be for the betterment of their future. We greatly appreciate all the firms who support the AJMAA. **Thank-you.**

On behalf of the “Bright Lights” consignors, American Maine-Anjou staff and myself, I would like to extend a warm welcome to you to be with us in Denver, CO. on Saturday, January 14, 2012 “in the yards” for the third edition of the “Bright Lights” Maine-Anjou Bull and Female Sale.

The Maine-Anjou breeders have held nothing back and have stacked the field deep offering to you 68 performance driven with eye-appeal bulls and 25 foundation lots of females and flushes. This sale is loaded with elite show heifers, future donors, rare flushes, promotional and herd bulls.

Maine-Anjou breeders have diligently worked at breeding cattle that are problem free. There have been many steer trials in recent time that have shown without a doubt (WDA) weight per day of age and feed conversion are key attributes in Maine-Anjou genetics. With feed costs and other input costs rising all the time feed conversion is a must to be profitable in the cattle business.

I hope you will be able to join us in Denver, as the field is stacked with quality and superior seed-stock genetics. Whether you are in search of a herd bull, promotional bulls, elite show heifer, donor female or rare flushes we have it all for your appraisal!!!

Look forward to seeing you “in the yards” on January 14, 2012, if you have any questions feel free to contact the consignors, sale staff, or myself as we will be more than happy to answer any of your questions. Safe travels and we will see you in Denver, CO.

Safe Travels,
Dustin Layton
405/464-2455

- Her dam (128U) is a full sib to BPF Mercedes Benz! When you see this female on the move you will be quite impressed with foot placement, ease of movement and soft pastern. Picture perfect in design does not totally describe this female. Take a good look at her epd's, balanced from one end to the other!!! We are very excited to offer this great young female. 128U's first daughter sired by Northern Improvement was a many time champion during her show career, we know you will agree Mercy Me will definitely get many many second looks.

• A VERY UNIQUE OPPORTUNITY WITH A VERY UNIQUE INDIVIDUAL! Jessica's look, balance, eye appeal, and natural width, all on a power packed skeleton! Taking all that into consideration her ease of movement may be her biggest asset. That ease of movement along with her total dimension has allowed her to dominate in the show ring this past fall. She had an unbelievable run at the majors, winning both the junior and open shows at the American Royal along with the junior show championship at the North American. She presents an outcross pedigree that one could mate to virtually any sire on the market and we can't wait to get that started. Jessica is backed by a powerful cow family that is built on generational greatness and production. We thought long and hard before parting with a piece of this genetic giant. This is a can't miss opportunity if you want to add diverse quality genetics that will create high returns! Jessica is due to calve in March.

K&A TOP SHELF 13T
Sire of Lot 9

TERMS OF THE FLUSH: The winning bidder will pay 50% of the hammer price the day of the sale with the balance due upon completion of the flush. A guarantee of six (6) transferable embryos goes with this lot. If more than eight (8) embryos are produced, any number above eight (8) will be split evenly between buyer and seller. Embryologist to be used needs to be agreed upon between both buyer and seller. A guarantee of one pregnancy goes with this flush lot. The flush guarantee is to take place no longer than six months after calving. Buyer and seller can agree on any further extension, if an extension cannot be agreed upon the 50% down payment will be returned. Buyer is responsible for all flush expenses.

• A direct daughter of the high selling bull (BPF Mercedes Benz 131U) in the 2008 Fall Bushy Park Production Sale who commanded \$75,000 for 3/4 interest. Her dam, sired by Hotline, is very maternal in her make-up and loaded with phenotype.

Dear Producer,

It is with great pleasure that I welcome you to the American Maine-Anjou Association's National Western Bright Lights Bull and Female Sale! It's an honor for me to have this opportunity to update everyone and share with you the positive benefits that the Maine-Anjou breed has to offer the commercial cattlemen.

Today's commercial producers often ask the question, "What genetics best fits my program to meet my marketing end point needs?" This is an extremely important question because it affects profitability of everyone's operations for years to come. I suggest to producers to step back and reevaluate your program and select the genetics to elevate the traits that need improvement. When producers consider a breed that can meet or exceed all traits from maternal strength to winning carcasses on the rail, the Maine-Anjou breed can "aggressively compete" in all phases of cattle production.

"Crossbreeding" has become the "buzz" word in the cattle industry as producers are looking for ways to improve their cow calf efficiency and profitability. Quoting Bob Weaber, Ph.D., Cow-Calf Extension Specialist, Kansas State University, "For commercial beef producers, the implementation of technologies and breeding systems that increase the quality and volume of production and reduce input costs is essential to maintain or improve the competitive position of the operation. More and more producers are finding that a structured crossbreeding system helps them achieve the goals of "increasing productivity and reducing production costs.

A large percentage of cattlemen sell their calves at weaning, so weaning weight becomes a crucial trait in their choice to maximize profits. Maine-Anjou sired calves do wean heavy and grow rapidly which allows producers many options. Because of the breed's genetic diversity of color options and breed percentages, producers have the ability to design a program that works best for their commercial operation. Producers who have been using modern day Maine-Anjou genetics have been extremely satisfied with the results. Calving problems have been minimal with the calves exhibiting great vigor at birth and high survivability rates.

Breed complementarity coupled with studies on genetic diversity continue to show the advantage of a crossbred versus a straightbred cow is approximately a thirty eight percent increase in the life-time production of the cow, 25% more weaning weight and 17% more calves. These are the major value added traits sought after by so many cattlemen today and can be provided when Maine-Anjou bulls are used in a crossbreeding program.

Recent studies have shown that "feed efficiency" is one of the most economically important traits, more than average daily gain, carcass grade, or pounds of live calf born per cow exposed. To show producers the value of Maine-Anjou genetics we conducted our first ever National Maine-Anjou bull test in Nevada, Mo. This trial measured all traits from gain to feed efficiency. The bulls included in this trial were sired by eight different sires and consigned from numerous producers. The trial ended with the Maine-Anjou bulls being the most efficient breed group overall of 151 bulls that included nine breeds with a -1.27 RFI (Residual Feed Intake). All of the Maine-Anjou bulls selling had a negative RFI! Please study the bull test results in this sale catalog.

Maine-Anjou bulls provide the versatility to design the program that best adapts to their operation and supplies producers with the most dramatic combination of growth, muscle, quality and yield grades, efficiency of gain and outstanding maternal values. The added muscle produces a leaner carcass with a high percentage of yield grades 1 and 2 earning feeders additional premiums and producing a heavy carcass to maximize potential profits. Please

take a moment to study Mike Holden's carcass results on 178 Maine-influenced cattle that were harvested at Swift & Co. using the GeneNet grid. The published results in this sale catalog are outstanding.

Maine-Anjou sired cattle can meet or exceed the demands of today's most critical commercial producer. Using Maine-Anjou bulls in a crossbreeding program can provide cattlemen with the elevated genetic package to design the program that best fits their operation.

Disposition is one of the major strengths of the Maine-Anjou breed. It plays a huge role beginning at calving time, processing, plus feedyards comment on the calmness of the cattle which helps to create an environment for big efficient gains. By investing in proven Maine-Anjou genetics, the added "Value" to your operation will help to provide you with a Balance of Genetic traits that will compliment any existing program!

Thank you for your interest in the Maine-Anjou breed and please feel free to contact me at (515) 201-3281 for additional information or if I can ever be of assistance in any way.

Sincerely,

David Steen
AMAA Commercial Developmental Director

National Maine-Anjou Bull Test Green Springs Bull Test of Nevada, MO

- 2009 was the first year for the Maine-Anjou breed
- Most feed efficient breed group overall with -1.27 RFI (1st Place)
- All Maine-Anjou bulls had a negative RFI score
- ADG: 4.01 lbs. (6th Place)
(1st Place was 4.11 lbs.)
- WDA: 3.26 lbs. (2nd Place)
- Ave. REA: 15.6 sq. inch (largest) (1st Place)
- Ave. IMF: 3.73 (5th Place)
- Highest sale average of all breeds
- Bulls were represented by eight sires
- 151 total bulls from nine breeds in the test

- **Consigned by Burke Show Cattle**
- I am excited to offer a full brother to the great "Showstopper" Bull we sold in this sale a few years back for \$10,000. He has sired 2 national champion females on the hill the last two years, and numerous top sellers and show winners across the country. His mother was the grand dam of "BPJV Hotline". Her legacy is working in herds all across the country. This bull is a stouter, deeper ribbed version, worth your consideration.

- This bull has a pedigree like no other. His dam is sired by OCC Legend and out of an Imprint/Angus female. Not only is there just the pedigree, but she can flat out produce good ones. She is one good looking cow and has passed that on to her offspring and grand offspring. We kept her first bull for ourselves and called him OHL Howdy. The first females out of him sold in our fall sale averaging \$7400. We have all the confidence in the world that this Open Bar son can do the same. He's moderate in size, plenty of performance and a real powerhouse. We thought long and hard about keeping this bull for ourselves, since we already have his brother we decided to let him go. He's a member of our MaineTainer pen of three bulls.

- Good cows seem to always produce good progeny and his mother hit a home run here. Open Bar works extremely well on Simmy influenced cows too. This bull is fault free in his structure and muscle pattern. He has the extra rib shape all in an extremely eye appealing and complete package. If you want to produce females that will go out and get the job done year after year, look this bull over well. His dam is a non-registered cow that is sired by JMAC which in turn is sired by Adrenaline and out of a Right Time Angus dam. With his extra look and completeness we wanted to offer him for sale in Denver.

AMAA Sale Terms & Conditions

Terms: Terms of the sale are cash or check, payable immediately upon conclusion of the sale and before animals will be moved. Seller will reserve the right to require a certificate check as settlement before releasing any cattle.

Risk: All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared "sold" by the auctioneer (but will be cared for at the purchaser's risk for a reasonable length of time).

Bidding: All animals sell to the highest bidder. Any disputes or challenges regarding bids will be settled by the auctioneer and his decision will be final.

Health: All animals sell with proper individual health certificates making them eligible for transport to most destinations within the U.S.

Announcements: Announcements from the auction block will take precedence over the printed matter in this catalog.

Registry Certificates: All animals shall carry papers from the American Maine-Anjou Association. All papers will be transferred and mailed to the new owner at the consignor's expense.

Shipping: Assistance will be given in making shipment after the sale, but no risk will be assumed by the seller. Expenses incident thereto are the responsibility of the purchaser, who should furnish shipping instructions at time of settlement.

Breeding Guarantee: Bulls: All bulls are guaranteed to be breeders. It will be the responsibility of the buyer to have the bull semen tested before he is turned out with cows or before 15 months of age, whichever comes first. If not done, the seller is not responsible. Any bull that has not proven himself a breeder, the matter shall be reported in writing to the

seller within six (6) months following the purchase or six (6) months after the bull has reached 15 months of age. Seller will then have the right or privilege of six (6) months to prove the bull a breeder. Any bull that has not proven himself a breeder that is healthy and in good condition may be returned to the seller at the buyer's expense. If the bull should fail to prove a breeder, the seller at his option, can return either purchase price to the buyer or replace the animal with another of equal value in settlement and satisfaction of all claims. In no event, shall the seller be responsible for more than purchase price. If the bull becomes a non-breeder by reason of injury, negligence or mismanagement, the seller's guarantee shall be void.

Liabilities: It is to be clearly understood that the AMAA, the sale manager and all their representatives act only as a medium between the buyer and seller. They are not responsible in any way for failure on the part of the buyer and seller to live up to his/her obligations to collect or enforce collections of monies between parties. Any legal actions, that may in exceptional cases be taken, must be buyer and seller.

Accidents: Although every precaution will be taken to protect the safety and comfort of the buyers and those attending the sale, the AMAA, or seller, or sale manager do not assume any responsibilities in the matter and each disclaims any liability, legal or otherwise, in the event of an accident or loss of property.

Contract: The above terms and conditions of sale shall constitute a contract between buyer seller of each animal and be equally binding on both. Animals that are resold following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by these sale terms and conditions.
